B-RAD BL SELECT 4000 OFFSET
BRUSHLESS BATTERY TORQUE WRENCH - TECHNICAL DATA

DESCRIPTION

The B-RAD BL Select 4000 Offset Battery Torque Wrench is a hand held, non-impacting battery driven power tool designed to apply torque to tighten and remove threaded fasteners.

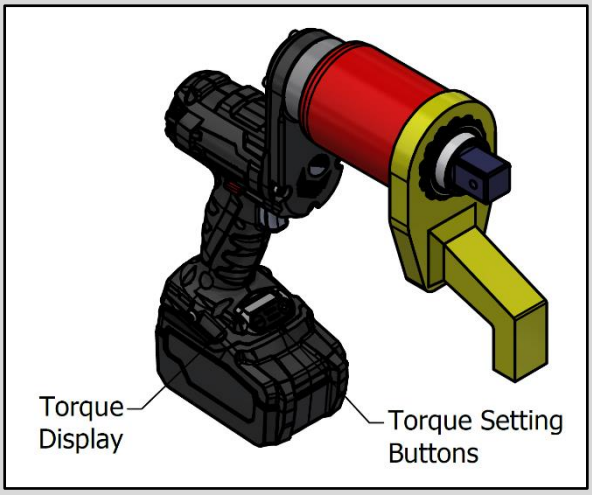

The B-RAD BL Select Offset series offers more flexibility for tight spaces with the inclusion of an Intermediate Offset Gearbox. This allows the square drive and Gearbox to be offset from the motor centre, enabling the Tool to fit into more confined areas.

The reaction force works in the opposite direction to the applied torque. The point of reaction should be kept as far away as practicable from the centre of the gearbox to minimise this force.

Torque is controlled by use of the torque setting buttons. The torque figure is displayed on the torque display.

The B-RAD BL Select 4000 Offset must always be operated with the following:-

- Lithium Ion Battery Pack (Supplied)
- Impact Quality Sockets
- Reaction Arm
- Battery Charger (Supplied)

SPECIFICATION

Output Square Drive (Male):	1" (25.4mm)
Direction:	Forward & Reverse
Torque Accuracy:	+/- 5%
Minimum Output Torque:	800 Nm (590 lbf.ft)
Maximum Output Torque:	4,000 Nm (2950 lbf.ft)
Speed:	3 rpm (Single)
Battery Charging Temp Range:	0°C To 50°C
Battery Charger Voltage:	110V or 240V (dependant on model purchased)
Noise:	Less than 85 dB(A)
Vibration:	Vibration level at handle does not exceed 2.5m/sec (Low)
Tool Weight:	6.4 Kg (14.11 lbs)
Reaction Plate Weight:	2 Kg (4.41 lbs)

ACCESSORIES AVAILABLE

The following accessories are available upon request and can be custom made to suit requirements. Please contact W. Christie (Industrial) Limited for more information:-

- Spare Lithium Ion Battery Packs
- Special Reactions
- Impact Quality Sockets
- Torque Checking System (Rundown Fixture)
